

Shunt resistor 0.5Ω

7014

- -0.5 Ω, ±1%, 20 W
- Max. working voltage: 550 VoltConnection: solder terminals

Application

• External shunt resistor in connection with the universal AC/DC transmitter type 4179 or trip amplifier type 2231.

Load

- 12.5 W without heat sink.
- 25 W with 535 cm² x 1 mm heat sink.
