

High Quality Metal Roller Wheel Temperature Probe (ST-35A)

Key Features

The roller wheel temperature measuring probe is suitable for measuring smooth, rotating or moving objects flat surfaces, such as smooth plastic, steel pipes, PC boards, textiles and conveyor belts.

- K type
- Temp: 450 C
- Stainless Steel Wheel
- With miniature connector
- Fast response time
- PU coil cable (yellow colour)
- Easy to measure the flat surface temperature of moving objects.
- Can be used with. Center thermometer (Model: 307/308)

Specification			
Thermocouple Type	Using Temperature	Accuracy	Standard Length of Coil Wire
K	450°C/842°F	0.75%, Class 2	Extensible from 0,7 to 1,8 meters

Note: All Probes Type K Are Supplied With Mini Plug
