

## Adjustable Angle Roller Surface Temperature Probe (ST-35C)

### Key Features

The roller wheel temperature measuring probe is suitable for measuring smooth, rotating or moving objects flat surfaces, such as smooth plastic, steel pipes, PC boards, textiles and conveyor belts.

- K type
- Adjustable Angle 180
- Temp: 350°C
- With miniature connector
- Stainless Steel Wheel
- Fast response time
- PU coil cable (yellow colour)
- (Straight cable length can be ordered as your request)
- Easy to measure the flat surface temperature of moving objects.
- Can be used with. Center thermometer (Model: 307/308)

SPECIFICATION			
Thermocouple Type	Using Temperature	Accuracy	Standard Length of Coil Wire
K	350°C/662°F	0.75 Class	Extensible from 0,7 to 1,8 meters

*Note: All Probes Type K Are Supplied With Mini Plug*
